

LUBESNIPER

Electric bulk fill pump series designed specifically for the demanding Australian market.

INFINITE POSSIBILITIES

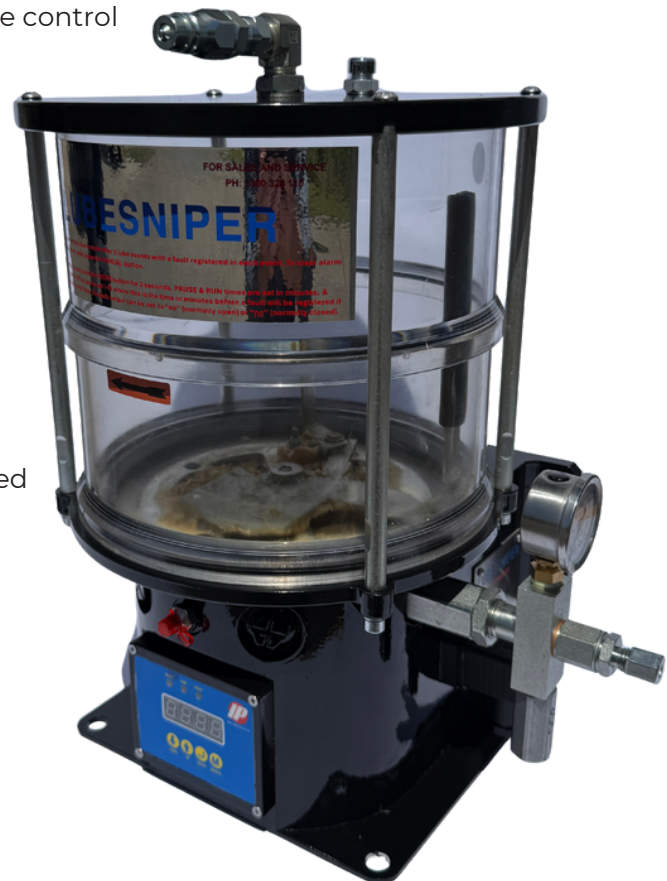

How LUBESNIPER outspecs the competition

LUBESNIPER is available in 3-L, 6-L and 9-L tank sizes (with or without overfill shut off systems), has options for both progressive and injector configuration and has unmatched standard features all at a groundbreaking price point.

- ☐ Standard with metal body, base, & lid
- ☐ Standard with rear and base mount
- ☐ Standard with 10-mm tie rod bars
- ☐ Standard with 1 adjustable pump element
- ☐ Standard with grease gauge and relief
- ☐ Standard with 5-m harness & assembled connectors
- ☐ Standard with run (green), fault (red) light switch label & connectors
- ☐ Standard with low level monitoring
- ☐ Standard with system monitoring plug and enable-disable control

- ☐ Standard with primary valve mounting bracket
- ☐ Standard with integrated elegant controller
- ☐ Standard with timer operation instruction sticker
- ☐ Stocked in both progressive and injector configuration
- ☐ Optional bulk fill overfill shut off system & coupling rated to 5000-psi
- ☐ Optional 3-L, 6-L, 9-L tank sizes
- ☐ Optional up to 4 pump elements
- ☐ Optional competitor swap out kits

LUBESNIPER

Part Numbers & Configurations

Part Number	Description
IP1020-3PA000AAA	LUBESNIPER 3-L Progressive pump without overfill protection
IP1020-6PA000AAA	LUBESNIPER 6-L Progressive pump without overfill protection
IP1020-9PA000AAA	LUBESNIPER 9-L Progressive pump without overfill protection
IP1020-3PA000BAB	LUBESNIPER 3-L Progressive pump with overfill protection & ¼" bulk fill coupling
IP1020-6PA000BAB	LUBESNIPER 6-L Progressive pump with overfill protection & ¼" bulk fill coupling
IP1020-9PA000BAB	LUBESNIPER 9-L Progressive pump with overfill protection & ¼" bulk fill coupling
IP1020-3IAEEEEAAA	LUBESNIPER 3-L Injector pump without overfill protection
IP1020-6IAEEEEAAA	LUBESNIPER 6-L Injector pump without overfill protection
IP1020-9IAEEEEAAA	LUBESNIPER 9-L Injector pump without overfill protection
IP1020-3IAEEEEBAB	LUBESNIPER 3-L Injector pump with overfill protection & ¼" bulk fill coupling
IP1020-6IAEEEEBAB	LUBESNIPER 6-L Injector pump with overfill protection & ¼" bulk fill coupling
IP1020-9IAEEEEBAB	LUBESNIPER 9-L Injector pump with overfill protection & ¼" bulk fill coupling

Innovation is in our DNA.

One of the most respected engineers of his time with over 250 provisional patents and over 112 accepted as world wide patented inventions, Richard Joseph (Dick) Ifield's engineering heritage lives on through the direct family lineage to Ifield Products.

As an accomplished inventor, Dick's most famous invention, a fuel pump known as the Ifield Pump was to become standard equipment on jet aircraft from Whittle's first jet engine through to the Concorde. This invention alone earned Lucas Industries millions of pounds through their own sales and through the sale of manufacturing licenses.

Through Ifield products we continue Dick's legacy though constant unrelenting innovation as we work with our industry partners on developing engineering solutions.

Our vision is to provide a gateway for innovation to flow from inventor to manufacture and manufacture to global distribution. Our win-win attitude and belief in transparency ensures all relationships are built on trust.

Uncompromised integrity is the cornerstone of all policy and relationships. Only manufacturers and distributors that share this vision will join our network and value solutions will flow globally to end users.
